World Co-operation In Prospect

Events of the past few weeks have concentrated attention on the independence of the nations of the world, and, by their promise of a general attack on the economic ills which plagued the world, have injected new hope in suffering peoples. The world's leaders have agreed to cure the ills which have prostrated the world economic system. Conversations of leading statesmen at Washington, definite assurance that the world economic conference will be held in London next month, the position that solution will be found in reciprocal tariff arrangements and adoption of an international monetary unit, have had immediate beneficial effect on the markets of the world, and appear to have restored some of the confidence lost in the crash of 1929 and the bitter years since.

Canada, too, faces the task of consulting its new crop to the fertile soil with a renewed vigour. The higher cottage Assurance fund, Washington and Ottawa of reciprocal agreements in the offing, that will tend to reopen channels of trade long made barren and unproductive by protective tariff barriers, have produced a most welcome reaction in the Prairie West. Conjoined with this looms possibility of an easing of the general trade situation in Continental Europe where Canada's wheat has found generally increasing obstacles to entry—obstacles created by local fears and narrowness of mind. They are the same toward world co-operation bars which is also the harbinger of such conditions as will make effectively beneficial the Empire trade agreements consummated at Ottawa, last year. With these auspicious circumstances encouraging him, no wonder the Prairie Farmer sows higher hopes with his seed this year!

The idea that an international problem can only be tackled successfully in an international way, was long in penetrating the minds of many world statesmen. This may have been due to the fact that statements were pre-verbally made in advance of practical steps, and it is a fact that public opinion, since the war, in favor of co-operation, has been notoriously nationalistic in sentiment in virtually every civilized country. In consequence, the nations have spared themselves to evade disarmament, despite the general abhorrence of war; and have erected tariff barriers in the futile hope of developing self-contained national economies, despite the fact that a custom port may be more provocative than a concrete fort. The result of this policy of anamolies has tended to retard concerted action upon the economic problem. The accompaniment of widespread unemployment and almost universal suffering, has finally served to awaken general realization of the essential interdependence of nations, and recognition of the fact that the sure path to recovery lies through co-operation. Even France, with all her hoards of gold, has been forced recently to borrow \$150,000,000 from England to buttress the franc, demonstrating that in this day and generation no country is so organized as to be able to live off itself alone.

Germany, too, has seen that the world at last has become internationally-minded; and that is a factor in reassessing itself. In Germany alone there appear to be a reactionary movement towards a narrower nationalism, but the movement in Germany is capable of a dual interpretation. It may be true that Herr Hitler and his Nazi army have resurrected some of the more subversive characteristics of Prussian "junkersm" in their so-called "bloodless revolution"; but it is also true that Herr Hitler has evinced a willingness to negotiate with other nations of the world, and to hold up a mirror of trade and commerce but also in matters of armaments. The world's experience of the last fifteen years internally in a narrow nationalistic regimentation by men imbued with the "administrative ideals of a sergeant-major" (as Gudella would say), is awake to the necessity of co-operation in the wider field of world politics and trade in the interests of world peace and world prosperity. That is to say, the rigors of the Nazi discipline would appear to be fundamentally protective of the world's peace, and the greater the rigor, the greater the rather than almost at any imaginary peril from without. In any case, the international situation does not necessarily impair prospects of a successful solution of the world economic problem, nor weaken hopes of a restoration of normal trade relations among the countries of the world.

British Authority Says Cinderella's Slippers Were Fur and Not Glass

Cinderella's slippers, popularly supposed to be made of glass, really were made of fur, according to Sir Gerald Wolaston, garter king-of-arms and an authority on heraldry. He told members of the Royal Society of Arts that the slippers were made of marten fur, which is made of white and blue. "The other idea," he said, came from a confusion with the French "verre," meaning glass.

Not So Good

A farmer's son once decided to be a lawyer. His father drove him into town and got him a job as office boy to a law firm. Three days later the young fellow was back home again. "Well, Josh, how do you like the law?" asked his father. "It's not so bad." "Aw, it isn't what it's cracked up to be," said the boy. "I'm sorry I ever learned it."

The Netherlands may restrict planted areas for agriculture.

Nervous—Could Not Sleep Tired Out All The Time

Mr. George Sculter, Nauvoo, N.B., writes: "I was so very nervous I could not sleep at night and felt tired all the time. I had a doctor from the Royal Milburn's Heart and Nerve Pill, as a doctor who made the time as gave me some to try. I found they were doing me so much good I prepared two boxes and they proved of wonderful help to me."

House Had Gold Ceiling Residence Of Former Chicago Bank Director Sold By Auction

The famous house with the gold-ceilings smoking room, lined with morocco leather—a house so luxuriously furnished it would have done credit to a fabulously wealthy Indian chieftain—was one of the auction block at Chicago.

It was the home of Frank A. Mulholland, real estate operator and a former director in the chain of twelve Elgin banks, who was indicted with other officials of the financial institution.

The house, situated in exclusive Beverly Hills, was one of the show places of the section. *

The building contains eleven rooms and sold along with it were the costly furnishings which included a beautiful hand-carved antique dining room suite of walnut, and French walnut love seats.

HAS LOST FAT FOR THREE YEARS

68 lbs. Gone Altogether

A woman writes: "For nearly three years I have been taking Kruschen Salts every morning in the hope of getting rid of my excess fat. My weight before taking them was 186 lbs, and it is now 128 lbs. velous. My mother and sister are also taking Kruschen salts and lots of our friends are doing the same. As regards diet, it is necessary to do one little bit of dieting; in my case I have never denied myself anything. I have been taking Kruschen Salts. I walk every day, and do not eat many potatoes or much meat. I am grateful to Kruschen Salts for the great help they have been to me, and I would like to thank you for recommending them to people I think I know."

—Miss K. T.

Kruschen effects a perfectly natural clearance of undigested food substances and wastes from the body.

It is claimed it is a valuable de-

tector and that 50 per cent. of the cases of vessels have hitherto been

caused by strandings and kindred

causes, many of which might have

been obviated by the use of sound-

ing apparatus capable of giving soundings accurately and in

short succession.

One member (working on a

ocean liner) was dependent on

pension or English income was be-

ing badly hit, the pound sterling hav-

ing dropped from \$4.86 to \$3.80 and

"servants" becoming a luxury. I

was amazed, however, to find how

comfortable and happy a family can

live with a few servants, but fit-

filled with labor saving appliances,

cheap electricity, and a cheerful and

efficient housewife."

Need More Cattle Steamers

Western Brokers' Claim Only Six Available For Trade

Neglect of the Dominion Government to send ocean tramps to the Canadian west coast is seriously retarding at Winnipeg. T. B. Brearley points out that only six tramp steamers are available to this trade, that two British companies have chartered these boats and that the Canadian Steamship Lines, which also offered to pay half the cost of fitting up the boats to carry cattle if the Dominion Government would pay the other half.

The Dominion Government was silent on this issue. Today, as a consequence, the only cattle export trade is limited by the lack of capacity of these steamers to carry cattle.

They are scheduled to carry 450 each

every three weeks to British all sum-

mer which will mean that a maxi-

mum of the year for 45,000 will be ex-

ported.

Canada could easily export 160,000

head it is claimed. The cost of fitting

a boat is about \$12 per head of cap-

acity. A boat big enough to take 500 head would cost \$6,000. A boat to carry 400 head would cost \$4,800.

Completes Twelve-Year Task

Friar-Art's Paintings Aston Walls Of Grace Hospital

Miss Chas. Mailand, priest-artist, has completed twelve years' labor in painting religious pictures adorning the walls of Grace Hospital.

His "Way of the Cross," just fin-

ished, consists of fourteen life-size pain-

tings of the stations of the cross.

They are rich in colour, beautiful

and of aesthetic value. In addition to

beautiful contrasts of colors, sym-

metry, order, regularity and bal-

ance, a variety of artistic effects are

achieved. The average cost of collec-

tion over these years has been 2.9 per

cent. of the amount collected, or

other words less than three cents to

collect one dollar.

The Explanation

Wife—"Henry, here you are grousing about a few little bugs for my hats, stockings, and whatnot. Do you know I could have married M. T. Head, the telephone magnate—and he's a millionaire, but I didn't."

Henry—"What, that explains why he's a millionaire."

They have made a new form of oath for dentists. It reads something like this: "Do you swear to pay the tooth, the whole tooth and nothing but the tooth?"

How to get to SLEEP

When you can't sleep, it's because your nerves won't let you. Don't waste time "counting sheep." Don't lose half your needed sleep in climbing. Take a tablet of aspirin, drink a glass of water—and go to sleep.

This simple remedy is all that's needed to insure a night's rest. It's all you need to relieve a headache during the day—or to dispose of other pains. Get these Aspirin tablets, and get your needed sleep.

Aspirin is safe, immediate—go to work without delay. This desirable medicine is not dangerous; it does not depress the heart. Just be sure you get Aspirin tablets.

ASPIRIN

Canada's Economic History

Exhaustive Research Throwing Fresh Light on Canadian History

Canadian scholars are adding, by the score, to the records of our national loves to Canadian History. There are a number of gaps in the records and places where the tale is unsatisfactorily vague, and the patient labor that is being applied to fill in these pages, is worthy of merit and encouragement.

What Mr. H. A. Innis is doing for Canadian Fur Trade, and Dr. D. A. MacClellan has done for Canadian Wheat Trade, Dr. A. R. M. Lower is doing for Canadian Lumber Trade. It is good news to hear that Dr. Lower has been invited to advise the Social Science Research Council for use in completing his study of Canadian Lumber Trade in the nineteenth century.

This research is not to result in a mere compilation of documents and maps, but is to approach the appreciation of a new English-French-speaking Canadian nationalism by the study of a staple trade. This point of view, which gives them knowledge on Canadian economic history, as well as social trends and political ideas, is theory, is throwing fresh light on the development of Canada's nationalism.

Dr. Lower will spend the summer studying the origins of the old Timber trade in England, and will make comparative studies in the Baltic area, looking through records in the ports of Danzig, Stockholm and Copenhagen.

Students of Canadian History owe a debt to the indefatigable researchers that scholars from coast to coast are putting forth to make the records complete. Winnipeg shares in the appreciations of their work—Whinney, Free Press.

Wet Days Are Holidays

The only day on the establishment of the British army is silly, a grey jackson stationed at Gibraltar. His job is to carry wet clothes from the military laundry to the drying ground and bring them back when they are dry.

Every wet day is a holiday for Billy.

Russian Newspapers

In Russia in 1913 there were 830 papers with a total circulation of 2,600,000. In 1917 Russia at the beginning of 1917—the latest figures available—there were 5,600 papers with a total circulation of 88,000,000 and papers are printed in eighty-four languages.

"NOW I FEEL FULL OF PEP"

Not Afraid of Sharks
New York Naturalist Says
Of Them Are Harmless

Sharks should have made a meal of Mr. Van Campen Heiner years ago; for life only becomes worth while for this New York naturalist—now visiting London—when he is studying the habits of these man-eaters on the bed of some tropic sea.

"I am not afraid of sharks," said Mr. Heiner, and he spoke the truth, for he has on scores of occasions ventured unarmed among sharks forty feet below the sea.

He has taken half-hour strolls along valleys of death beneath the waves, where his companions have been charmed by the even more deadly sharks.

For nine months in the year Mr. Heiner has to work in his father's office, buying and selling coal.

Then for three months he lives on little-known tropic islands, studying life in the world of water which he has never seen before.

He will shortly sail for a destination in the Indian Ocean to search for new species, and renew his flirtation with hideous death.

"The majority of sharks," he said, "are harmless. There are 250 kinds of sharks, only a dozen are dangerous to man."

"I am not afraid of sharks, but I am afraid of the barracuda and the octopus."

"The barracuda is a wholly evil fish that bites at anything, man or large."

"The shark is about the least intelligent of the sea serpent. It is stupid that in Greenland the so-called shark has not the sense to go out with the tide. It allows itself to be stranded high and dry on the beach."

Mr. Heiner said there is nothing left for the naturalist on the earth's surface but to "go up in the air and go out in the water."

"I firmly believe in the existence of the sea serpent. There are also other monsters of which we know nothing."

"There are certainly larger monsters than the whale. The sea serpent is, and from my studies I would say it takes the form of a kind of giant octopus."

The coal merchant-naturalist described strange fish he has seen. "I suppose," he said, "some of them would provide new clothes for the people, but I am scared stiff of fish eating men."

"It is dangerous to eat fish in the tropics. In Ecuador, South America, nobody with any sense eats fish of any kind after 11 o'clock in the morning. This is because of the rapid deterioration."

When Buying Was An Experiment

"I'll try a pound of this," said your grandmother, "if you are sure it's fresh."

That was sometime in the second hour of her morning's search for groceries. She went from one open barrel or open box to the next, along an unappetizing row of crackers, teas, cereals, dried fruits, lard and sugar—all in bulk. She shooed the flies away, looked at, touched and tasted each article suspiciously, and finally decided to buy or not to buy, as her judgement directed. She couldn't trust a servant to do it. It was a day's work in itself.

Today, in two minutes, you give the grocer your order. You know that everything you get will be fresh, pure, attractively and cleanly packed. Why? Because you asked for advertised brands.

Advertising has taken hours of hard labor out of every housewife's day, and lines of worry off her forehead. It has made the morning's marketing a matter of certainty instead of guesswork.

Do all of your buying this easier way—
read the advertisements!

SURAWIGHY PLANTS—Everlasting,
Siebost, Northern, and Mastodon.
Delivered in Gleichen \$2.50 per ton.
The Lyle Farm, Arrowwood, 9.

Anyone wishing to have graves tidied up see Eli Woods.

The Gleichen Flour Mill

Beam Ideal Flour is becoming more popular every day. It has been used exclusively since the mill opened and it is now being used by nearly every farmer in the Gleichen district. It is also being used to a considerable extent by the flour mill in the city. Within a radius of forty miles from this center, the circle is gradually growing.

This mill is now running twelve hours a day and good milling wheat is being accepted in exchange for mill products.

The price of flour, bran and shorts is invariably based on the price allowed for wheat at the mill.

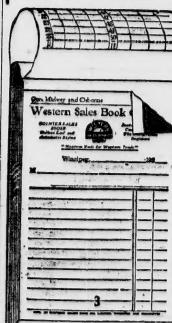

TRUCKING

Have any trucking to do? If so see me for specials.

Good mine run coal \$4.75 a ton
Cartage on Indian coal \$1.50 per ton
I handle Turner Valley gas in any quantity. Drive up to our modern filling station and get it.

THE GLEICHEN CALL

Unless a Chinaman has grand children he is not permitted to wear whiskers. The barbers syndicate must have great power in the Flower Kingdom. Arguing with a woman is like going into a shower bath with an umbrella. What good does it do?

Town & District

Mrs. J. H. Wilson and daughter, Isabel, entertained recently at tea, in honor of Mrs. H. Thomas, who is leaving shortly to reside in England. The afternoon was spent in song contests and Mrs. David McLean told some stories. The invited guests were Mrs. Thomas, Mrs. Cook, Mrs. J. Ferguson, Mrs. Goodfellow, Dr. H. L. Drew, Mrs. David McLean, Mrs. J. Hatchison, Mrs. W. Harrison, Mrs. Bates, Mrs. R. Bolinger, Mrs. T. Bates, Mrs. W. Evans, Mrs. G. McLean, Mrs. Duncan McLean, Miss M. Ferguson, Miss M. Bolinger, Miss M. McLean, Miss L. Hutchison and Miss G. Wilson.

Jack Moss who for several years busters warehouse here has been transferred in charge of the District to Niverville, and left for there last week. With Jack's going, the warehouse is now empty, and Mr. Moss, who has been highly interested in sports, especially hockey and after surviving year after year reached the goal of his ambition by capturing the intermediate hockey championship of the province last year with his family team, the Gunners, has now turned his attention to ice skating and has succeeded in developing the performance. Jack says he will be back next winter and his friends supplement the statement that he will bring a team that will defeat the Gunners. Mrs. Moss and family will remain here for the time being.

Peter Downey who has been attending the University at Edmonton has returned home for the holidays.

With an unusually late start, and with still occasional interruptions in many districts by rain and rather backward weather, seeding of wheat has been making slow progress over the greater portion of the province. The weather has been unusually cool, with a serious grasshopper infestation. The provincial department of agriculture is making elaborate plans to handle the situation and have already the organization under way and the arrangement of seed and equipment of sowing stations at various points. The federal officials located in the province will co-operate in the campaign. The arrival of the recent heavy rains with chilly weather has helped to mitigate the situation.

The picture Ben-Har, was exceptionally well attended Saturday. All in town took in the matinee, thus relieving the seating accommodation to a great extent for the two evening performances, and many extra seats had to be supplied to accommodate that audience. For Saturday night the following performances will be shown: "The Mysterious Rider" from Zane Grey's novel and "Robin Son Cruise" featuring Douglas Fairbanks. There will be a matinee at 2:30 and two showings of the pictures in the evening at 7:30 and 9 p.m.

A few people around town have recently painted their houses and garages. And what a difference a little paint makes to the appearance of a street or lane.

Last Wednesday afternoon a large number of trees were planted at the lake by a hikers' dozen of hole diggers. The town planning commission has drawn up plans for the beautification of the lake and these plans will be followed and carried out. All the trees and hedges are planted and get a little larger the lake will be a beautiful spot to spend hot afternoons picnicing, swimming etc.

A real soaker in the shape of rain started to fall Saturday night and fell intermittently until Tuesday noon. This heavy fall of rain will delay seeding for several days. All side roads were turned into a quagmire and many a car that attempted to negotiate them slid into the ditch there to stay until pulled out by horses.

Splinter-free glass for spectacles is now being made that will resist the impact of the discharge from a shotgun without breaking.

One of the best shipments of live stock to leave Southern Alberta was made up some days ago at Lethbridge when 60 head of beef cattle were shipped to the British Isles. The cattle were fed for 190 days on ground wheat, ground flax and hay. Their maximum consumption per head per day was fifteen and half pounds of ground flax, three pounds of ground hay consisting of two-thirds rye grass and one third timothy.
